Line Ministry Consultations on the UN Sustainable Development Cooperation Framework and Breakout Group: Outcome 2

Lists of issues from the chat box and plenary discussion

Questions & Answer

No.	Agency	Question	Remark
1.	MOPH Global Health Division (Waliaporn)	• Slide 2- Coherence with NESDP on UN focus area 2 • Digital transformation and inclusion may be one component as key success factor. **People Centred**: People literacy may be a real focus and goal of human development rather than utilizing tools (digital transformation and inclusion). • From chat of Dr.Walaiporn: My humble opinion to Dr Daniel's point on a useful area which UN can support Thailand is "to equip people with literacy through life course" Literacy is now understood as a means of identification, understanding, interpretation, creation, and communication in an increasingly digital, text-mediated, information-rich and fast-changing world.	**ITU**: Wider scope of societal issue on digital inclusion and transformation. Lesson learnt from COVID-19 landscape as a crucial tool and closely linked with human capital issue. **WHO**: Highlighting question on strategy to achieve the outcome and to enhance capacity of population. Value added that UN system can contribute, catalyst role to bring social capital. **UNICEF (KK)**: Everyone is connected and agreed with 'People Centered' should be more prominent. Also agreed with comment on 'Security'. Linkage with aging problems on adolescent development and digital innovations. **UNFPA**: ready to support MOPH **UNESCO**: agreed with comments from MOPH on digital inclusion. The promotion of access to internet is required together with digital literacy.
2.	ONCB	• Decade of action? To be clarified • What is mechanism, best practice, KPIs, tool to achieve the goals? • How to translate concept into practices?	

Comments, observation, and recommendation

No.	Agency	Issue	Remark
1	MODES	• Agreed with comments of MOPH on digital transformation and inclusion are key success factor but may not be focus area. • Thailand has a solid digital infrastructure and would like to focus on its investment on digital literacy to promote better preparation for conducive ecosystem.	

		• Support youth participation and sharing of good practice from the other countries	
2	MOIndustry	• SDG always guides the work of Ministry of Industry. • Green skill and green job are required UN support on capacity development. Development of green career path and development should be supported. • MOID used to coordinate with MOL to promote the issue which will contribute to green industry and economy. • The effort of green logistics is required the support and capacity development of human resources is important.	• **UNIDO**: SMEs still demands support from government in term of capacity development. To note that focus area 1 on skill development required attention on issues raised by MOID and UNIDO is ready to support.
3	MOPH (Suriya)	• Support comment from Dr. Walaiporn, Giving more importance on digital technology. • Highlighting gaps and challenges on people left behind. • Suggesting to **"highlight people left behind to access public service by enhancing digital transformation and inclusion"** instead. • In term of addressing Thailand prominent health challenges, the missing component is strengthening **"Heath security" (suggest adding this component)**. This is to cope with situation which may be beyond health issues and covers well-being.	
4	MSDHS (Department of Promotion of People with Disability)	• Highlighting issue of persons with disability to aware and incorporate universal approach in term of using digital technology. • Appropriate and facilitate disability and elderly (Inclusion).	
5	Secretariat of House of Representative (IPU)	• The parliament also contributes to SDGs to promote engagement and advancement of MPs to achieve SDGs. • Online child sexual exploitation is one of focus. • Mainstream advancement of SDGs in legislative works. Need more collaborative approach by	

		establishment of MP focal point in new future. • Raise awareness and capacity of MPs to work on SDGs. Refer to parliament-UNDP MOU as a key evidence to move forward.	
6	CYCT	• Good strategy and framework • Awareness raising to youth and children are required, considering of active engagement of youth at present. • Encourage all agencies to engage with children and youth. • Youth education and employment are interesting issues. • Key issues to consider are gender equality, oportunity for education and environment.	• Voices of youth • **UNICEF (Illaria):** Highlighting youth participation and inter-generation divide. Engagement participation of young people is important, and UNs can provide technical support including standards, experience on human centred design to support youth and children as active change agent.
7	MOE	• MOE acknowledges innovations that enhances human capital. • MOE can exchange knowledge and expertise on this effort with neighbouring countries. • MOE human resources and institutions will help enhance develop human capitals and left no one behind.	
8	NESDC	• Support comments on youth development and participation of Illaria of UNICEF. • Skill development is very important intervention.
